

Quick survey - facilitators and barriers to prescribing treatment for hepatitis C

If you are a registered general practitioner currently working in primary care in Australia, we would like to invite you to take part in a survey regarding facilitators and barriers to prescribing treatment for hepatitis C.

By completing this survey, you agree for your responses to be collected by the **University of Sydney** to inform future research in to strategies to increase the uptake of treatments for hepatitis C. Taking part is voluntary. Your responses will be anonymous.

A blue rounded rectangle containing a simplified survey form. It has three horizontal lines at the top, followed by three rows, each consisting of a red square checkbox with a black checkmark inside, and a horizontal line to its right.

This survey consists of 5 questions and should take less than 2 minutes to complete.

Your input can make a real difference. As well as providing valuable information on hepatitis C management, for every completed survey we will **donate \$5 to Lifeline**. Please fill in the survey today to help two good causes.

Lifeline (lifeline.org.au) - a national charity providing all Australians experiencing a personal crisis with access to 24 hour crisis support and suicide prevention services.

Please click on the following link to complete the survey
